Data Engineer / BI Developer

+33 6 11 74 70 08

5 years of experience · Master's in IT (Cybersecurity & Data) · English C1

Data Engineer and BI Developer with 5 years of experience in data pipelines, business intelligence, IT infrastructure, and automation. Strong background in Python, SQL, and Power BI, with a solid foundation in cybersecurity and systems administration. Curious, autonomous, and rigorous — eager to tackle complex data challenges.

CORE SKILLS

Languages	Python · PowerShell · SQL · JSON
BI & Data	Power BI · Elasticsearch · Grafana · Power Automate · SSIS · Databricks
Cloud / DevOps	VMware · GitLab · Zabbix · Nagios · ServiceNow · ITM
Systems & Network	Linux · Windows Server · Cisco · Azure AD · Microsoft 365
Security	ISO 27001 · CyberArk · Varonis · MFA/SSO/EDR · Pentest
Methods	Agile · REST API · jQuery

PROFESSIONAL EXPERIENCE

DevOps / Automation Engineer — CAGIP

2025 – This day

Project: Supervision Cluster — IT process automation & industrialization

- Developed PowerShell and Python scripts (versioned via GitLab) to automate IT processes: email data retrieval, automatic incident creation, ERP database updates
- Integrated APIs with ITSM and monitoring tools (ServiceNow, Elastic, Zabbix) to centralize events and improve incident management
- Built BI dashboards for IT supervision (ITM): backup status tracking (VDD, servers, mainframe), ERP-to-monitoring correlation tool for consolidated SI visibility

Stack: Python · PowerShell · Elasticsearch · Power BI · Grafana · ITM · Zabbix

Data Engineer / BI Developer — PERENCO

2023 – 2024

Project: Data tooling for business teams — BI dashboards, Python & SQL development

- Designed and administered BI solutions for complex environments (oil production, seismic data): cross-referencing activity reports, studies and schedules; variance analysis (forecast vs. actual) via decision indicators
- Developed analytical dashboards for production monitoring, performance tracking and forecasting with anomaly and trend detection
- Automated data pipelines (ingestion, transformation, refresh) using Python and Power Automate
- Migrated and optimized SQL databases: schema redesign, query performance improvements, BI flow security

Stack: Python · Power BI · SQL · Power Automate

Security Analyst (Apprenticeship) — NGE

2021 – 2023

Project: Security solution integration & infrastructure monitoring

- Deployed security dashboards (MFA, SSO, EDR, MDM) using PowerShell for data collection and Power BI for modeling and visualization
- Deployed and configured Nagios for availability monitoring and alerting on critical infrastructure
- Set up a password manager and defined access governance and security policies
- Administered Microsoft 365 / Azure AD: passwords, mailboxes, licenses, accounts and security policies

Stack: Power BI · PowerShell · Nagios · CyberArk · Varonis · S1 · AD · Azure AD

Systems Administrator (Apprenticeship) — LUMA

2020 – 2021

Project: Systems & network deployment

- Administered VMware, Windows Server and GLPI environments (asset management, incidents, requests)
- Set up Zabbix and Grafana monitoring solutions: metrics collection, alerting, infrastructure performance visualization
- Deployed and administered network infrastructure: switch and Wi-Fi access point configuration, cabling, datacenter operations
- Deployed IoT devices based on Raspberry Pi: Wi-Fi↔Ethernet bridge, temperature probes for datacenter overheating detection
- User support: diagnosis and resolution of systems and network incidents

Stack: Cisco · VMware · Zabbix · Grafana · Windows Server · Raspberry Pi

PERSONAL & ACADEMIC PROJECTS

Data Analysis App — Clash Royale API

- Built a React web application analyzing video game statistics via the official API; deployed on DigitalOcean (Ubuntu Server)

Stack: React · REST API · DigitalOcean · Ubuntu Server

Penetration Testing — Self-learning

- Self-taught ethical hacking using Root Me challenges and Kali Linux tooling

Stack: Kali Linux · Root Me · Raspberry Pi

Cybersecurity Awareness — High School Outreach

- Led a group presentation at a local high school: slidedeck, flyers, and games to raise student awareness of cybersecurity careers

EDUCATION

2023	Master's Degree in IT — Cybersecurity & Data (Distinction: Très bien) <i>CESI</i>
2021	Bachelor's Degree in IT (Distinction: Très bien) <i>CESI</i>
2018	BTS in IT (Mention: Bien) <i>CCI</i>

LANGUAGES

French: Native **English:** C1 — Proficient & Autonomous
